## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. For example, (i) page 77, line 11 of claim 1, the selective group format is improper because Markush terminology requires the phrase "selected from the group consisting of" and the connector "and" between the last two members, see MPEP 2173.05 (h); (ii) page 78, lines 17-23 of claim 2, the format of "selected from" group is not correct in that the conjunction word --or-- before the last term should be used; (iii) page 78, line of claim 1, the term "deriving" should be replaced with --derived--; (iv) improper dependency throughout the claims; (v) page 82, line 3, the limitation "preferably having essentially the same formula" renders claim 16 indefinite due to the use of the term "prefer"; (vi) informality in line 20 of page 84; (vii) period "." should not be used in the middle of the claim 41, page 92, line 1; (viii) improper multiple dependencies throughout of the claims and the list goes on and on.

Applicants are urged to check though the claims to correct all of the improper and indefinite languages.

***Allowable Subject Matter***

3. Claims 1-41 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Metallocene complexes are widely used in the polyolefin industry as the catalyst; however, no reference has been found which teaches the metallocene complex containing the conjugated diolefin and/or vinyl aromatic units derived from anionic polymerization. Therefore, the subject matter of the instant claims is deemed to be novel.
